

Our Commitment

At Dakota Home Care, we are committed to providing personalized medical care in a healing home environment.

Each of our care professionals adheres to the following core values:

- **Caring:** We demonstrate sensitivity to the needs of others and make them a priority.
- **Connection:** We value relationships and incorporate clients, families, and local resources into care.
- **Creativity:** We acknowledge that obstacles arise. We find solutions together.
- **Integrity:** We pursue moral soundness, understanding you have entrusted us with your care.
- **Excellence:** We are committed to pursuing our personal and professional best.

1200 Collins Avenue
Mandan, ND 58554
- **Fargo**
Brandt Office Park
3523 45th Street South, Suite 154
Fargo, ND 58104

Nursing Care

Our Team

Keeping your family member at home is a team effort. Dakota Home Care staff work with you, your family, and medical team to provide top-quality care. From office staff who work on insurance logistics to our clinical staff who provide direct care, our number one priority is keeping home an option! We go to great lengths to ensure our team of RNs and LPNs deliver competent and personalized care services in your home. Additionally, each client is assigned a case manager who works closely with providers, family, and nurses to keep things running smoothly.

Our Services

Our in-home, long hour nursing services are ideal for infants, children, and adults who need specialized care and support from a professional RN or LPN to remain safe and thriving at home. Our team of experienced, compassionate care professionals can assist with services such as:

- Tracheostomy/Ventilator care
- Enteral nutrition
- Medication administration and management
- IV therapy
- Wound care
- Central line care
- Lab draws
- G-J tube care
- Ostomy care
- And more

Our Process

- 1 You or your healthcare provider/social worker contact Dakota Home Care to let us know about your needs. We will complete a Release of Information form, allowing us to speak with your medical team.
- 2 We will work with your medical provider and insurance company to find out how many hours of nursing care you qualify for.
- 3 One of our nurse case managers works with your family and medical team to coordinate discharge to home (if hospitalized) and admission to in-home nursing care, meanwhile finding nurses who will visit your home on a consistent basis.
- 4 An individualized care plan is created and nursing care begins.

We are here to provide the answers you need to make informed decisions and the empathy and compassion you deserve while navigating an often-overwhelming experience.

Visit us at [DakotaHomeCare.com](https://www.DakotaHomeCare.com) or call us at **(877) 691-0015** to learn more about our comprehensive in-home nursing care services.
